

Data Sources & Acknowledgements

Storm Tide Evacuation Zones are based upon geographical data from the National Storm Tide Mapping program. Evacuation Zones are designed to provide an easy-to-understand method for the public to identify coastal areas that may be affected by storm tides caused by tropical cyclones or severe east coast storms.

While every care is taken to ensure the accuracy of the data used on this map, the Council nor any data providers make no representation or warranties about its accuracy, reliability, completeness, or suitability for any particular purpose and disclaims all responsibility and all liability for all expenses, losses, damages and costs which you might incur as a result of the data being inaccurate or incomplete in any way for any reason.
