

November 2023

Dear Parents/Guardians of Year 7 to 9 students,

In 2024 all Year 7 to 10 students will be using scientific calculators as an integral part of their standard equipment.

The College has chosen to use the TI-30XB Multiview Scientific Calculator, as this calculator's display and functions are closely related to the graphing calculator (TI-Nspire) that is used in our senior mathematics classes. All instruction is delivered with reference to Texas Instruments Calculators.

The Texas Instruments TI-30XB Multiview is available for purchase at the College Uniform Shop for \$25.00 (GST inclusive).

We believe we have negotiated the best deal possible for our students and hope that students will take this opportunity to equip themselves appropriately for their senior mathematics studies.

The calculators have a one-year warranty. Care, maintenance, loss and any replacement of the calculator will be entirely the student's responsibility as it will not be covered by any College insurance. Students are encouraged to ensure that their calculator is engraved with their name. This can be done at the college in the library.

Yours sincerely,

Mr Chris Oxford
Head of Mathematics
