BYOD – SECONDARY STUDENTS RECOMMENDED DEVICE SPECIFICATIONS

STANDARD RECOMMENDATIONS

The following laptop specifications would be recommended to suit the majority of subject pathways at Townsville Grammar School:

- INTEL i5 processor
- 8 GB Ram
- 250 GB Hard Drive

The following options are dependent on personal preference and budget:
- Touch screen
- Screen size
- Placement and number/type of USB ports

Purchase of Microsoft Office would be not required, as this is available free for students while enrolled at the School.

ADVANCED DAT, MUSIC COMPOSITION OR VIDEO/GRAPHICS

This recommendation does not apply for students undertaking advanced DAT applications, advanced music composition or advanced video/graphic manipulation, any of which would benefit from higher than standard specifications for a BYOD laptop.

In these situations, an INTEL i7 processor and/or 16 GB Ram would be of benefit.

APPLE

Apple Mac laptops are compatible with the school BYOD network and free use of Microsoft Office, but may not be compatible with all software used or suggested.

TABLETS

Tablet devices (including Apple iPads) are not suitable as a replacement for a laptop device due to software constraints and performance.
